

## BATTERY COLLECTOR BIN

**Nova Mobilier**, a company specialized in environmental products, offers a wide selection of battery collector bins. For best covering of different customer's needs, we are offering a full range of battery collector bins from 10 to 30 liters capacity. Safety is first with those products. Our collector bins are manufactured with powder painted steel completed with clear polycarbonate tubing. Our attractive battery collector bins are designed to be placed in different public collection points. The transparent tubing is assuring a clear view of the remaining capacity of the battery collector bin.

Many customers have told us they like our battery collector bins because those are designed and built for safely collect, and store used batteries.

Our battery collector bins are recommended by the fire departments for their security. In fact those are using fire retardant polycarbonate as clear material.
