

HALF MOON BULLSEYE™ RECYCLING BINS

HALF MOON BULLSEYE

The 519 Half Moon Bullseye™ recycling bins are designed for space saving when your space is tight. Place it against the wall or mount it on the wall with a floor clearance for cleaning, and it takes up less space.

Those Half Moon bins have been designed to maximize participations rates and encourage source separation by combining function, style and durability.

Made from polyethylene, those bins are affordable and recyclable at life end.

The 519A is designed for cans and bottles. The container comes complete with a round hole in the lid and a proper Recycling decal.

The 519B is designed for recyclable materials. The container comes complete with a rectangular hole in the lid and a proper Recycling decal.

Furthermore, to create a 2-way recycling center, the half Moon containers are available mounted back to back with or without caster wheels.

The standard colour is blue. Other colours available at no extra cost: sandstone, grey-granite, greenstone, black and red.
