

LARGE VOLUME BULLSEYE™ RECYCLING BINS

BULLSEYE 559 SERIES

The 559 series Bullseye™ bins are designed for mid-sized volume areas as offices, cafeterias, etc, and are available in 2 models. Those have been designed to maximize participations rates and encourage source separation by combining function, style and durability.

Made from polyethylene, those bins are affordable and recyclable at life end.

The 559A is designed for the source separation of recyclable cans and bottles. The container comes complete with a round hole in the lid and a proper Recycling decal. Code number B50-02200.

The 559B is designed for the source separation of recyclable materials as Paper-Plastics-Metal-Glass or for Waste. The container comes complete with a square hole in the lid and a proper Recycling decal. Code number B50-02207.

BULLSEYE 108JB

The 108JB Bullseye model offers a huge capacity and makes it the perfect solution for areas where recycling large quantities of cans-bottles is necessary.

The container comes complete with a round hole and wasp flap in the lid and a proper Recycling decal. Code number B56-02038.
